

Two-Stall Shower

The Royal Restrooms Two Stall Shower Unit is a simple solution for events such as weekend festivals or for use at certain job sites. This unit may be combined with additional Royal Restrooms for large events. Originally designed for disaster relief efforts, the Royal Restrooms Two Stall Shower Unit is the perfect choice for emergency situations or in any case where power and water sources are not readily available. The Royal Restrooms Two Stall Shower Unit includes two unisex bathrooms each furnished with a sink, toilet, and shower. Whether used for a special event or emergency situation, Royal Restrooms provide individuals with the comforts of home in clean, private, and spacious stalls featuring:

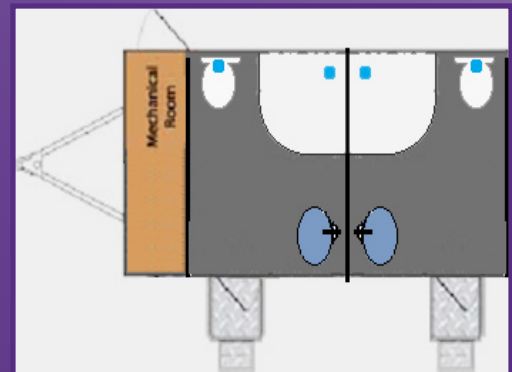

- Showers
- Flushing Porcelain Toilets
- Sinks with Running Water
- On-Demand Hot Water (Propane Gas)
- Mirrors
- Soap and Hand Towels
- Air Conditioning and Heat
- Low Level Outdoor Lighting
- Occupancy Light Indicator
- Rugs and Pictures

The unique design of Royal Restrooms gives them the mobility to go virtually anywhere. The Two Stall Shower Unit is completely self-contained and operable using (2) 110 volt outlets or generator(s) for the lights, heat or air conditioner, and on-demand propane water heater. (Unit pulls a maximum of 20 amps.)

Water is supplied by a spigot and garden hose or a 165 gallon on-board fresh water holding tank. The unit houses a 200 gallon black water holding tank; grey water from the showers can either flow directly into the waste holding tank or be diverted to a septic connection. If operated from a continuous water source, the unit provides approximately 450 hot showers.

Weddings, Festivals, Fundraisers,
Business/Residential Remodels,
Film/Music Productions
